On Certainty in Life

I am *sure* about everything everyone else **doesn't understand**, but I am *confused* about everything everyone else **is certain of**. **Everything** you have seen and heard is *wrong*. What we were *taught* was true in school is **irrelevant**. The things **we think are** really important are *very unimportant* and the things that **we think aren't** very important are the *most important of all*.

This is my **mobile website**. Try my desktop website, if you want to see more.

Apple Watch, Apple TV, or other device users wanting a further simplified version, with less to look through, or wanting faster loading, over slow connections, should try the Really Mobile Wearables and TV Section.

This mobile site should technically work with wearables like the Apple Watch and TVs, but you will likely be happier (and have to scroll a lot less) in my Really Mobile Section.

Website Description by Ben Huot

I am a researcher, writer, and designer for **consumer, citizen, and seeker advocacy**. I can *improve your life, by giving you better advice*.

Before Distributing my Book

Remember to *read the license, before* distributing. The *original PDF*, with **no modifications**, is the only one licensed, for re-distribution. Please **do not** offer this book, in print, or *in any other file format*, or make any other modifications, to the PDF file. I will take you to court, *if necessary*, if you don't follow the license (which is included in the first section of the PDF). **Do not** add my books to any *online bookstore*, or *file sharing* service, as they usually try to *convert my books, to another file format*, automatically. If you want to distribute my books *in another file format*, I have Zip bundles by Topics, Reference, and Main Series, as well as by device type, which **you can** distribute, under *the same conditions*.

Rational Paradox: Theological Positions

my unique Christian theological beliefs

The purpose of this book is to bring together the complete theological (non-)system explaining: the historical and future trends of the society I live in, what I believe, what I believe my mission is, the nature of the Trinity (God), and responses to the typical counter arguments. This paper is highly technical and exhaustive theologically, but written in simple language and brief in length. I call this theology Rational Paradox, because it is based on a unified and holistic worldview, drawing from both rational and mystical sources, for theological arguments.

theology, bible, paradox, reason, emotions, world history, end of times, faith, mission, trinity, nature of God, rebuttals, opposition, systematic, holistic, alternative, creative, mystic, asian
